

CITIZEN SCIENCE

CONFERENCE

14.–15.10.2020

Knowledge for Change: A decade
of Citizen Science (2020–2030)
in support of the Sustainable
Development Goals

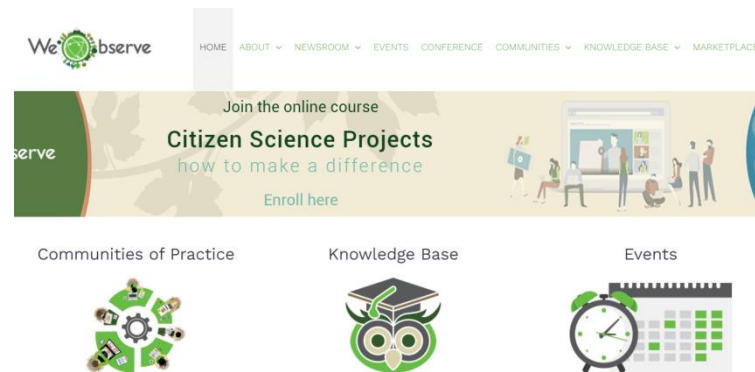

Experiments with interoperability to unlock the meaning within Citizen Science data.

Joan Masó (CREAF), Ester Prat (CREAF), Andy Cobley (University of Dundee)

The WeObserve project

- H2020 Project. Coordinate and support action
- Inventory of citizen observatories and sustainability
- Facilitate update and adoption in EO communities
- Create 4 Communities of Practice
 - CoP Engage
 - CoP Impact
 - **CoP Interop**
 - CoP SDGs

Experiments with interoperability to unlock the meaning within Citizen Science data.

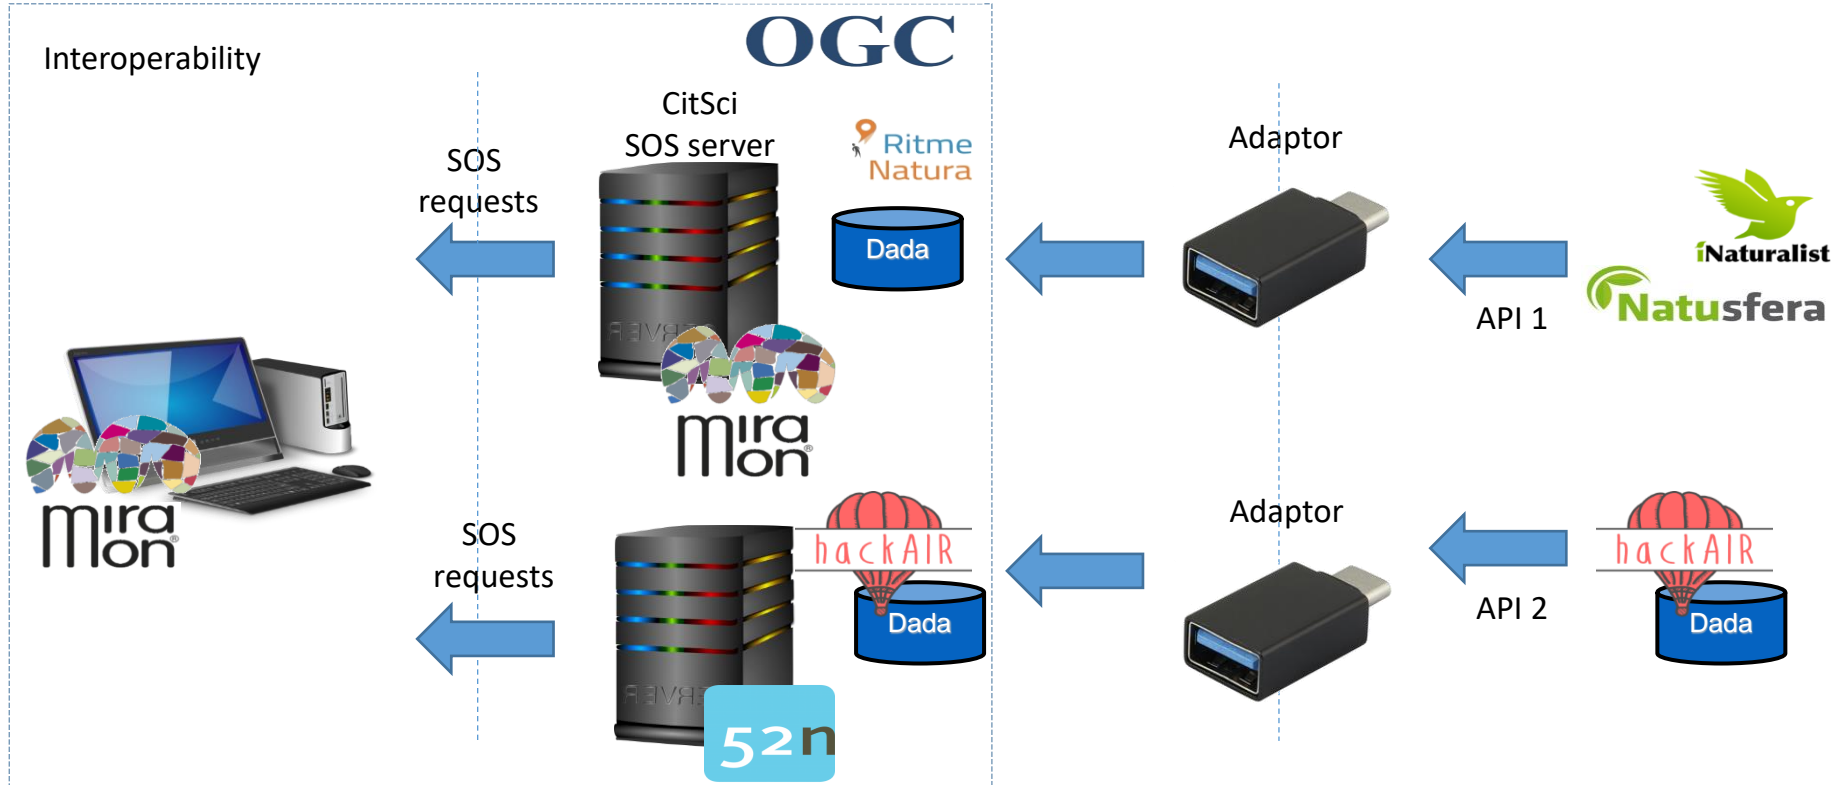

We TEST Citizen Science data sharing using OGC standards such as O&M, SOS and STA

- We have 4 SOS services
 - GROW Hydrologic SOS
 - istSOS (<http://istsos.org/>) in DLR hackAir
 - 52North SOS
 - MiraMon SOS
- We have 3 SOS clients
 - the MiraMon Javascript
 - Grow client
 - Hergoland client from 52 North.
- We produced a set of instruction on how a CitSci project can easily setup a SOS service

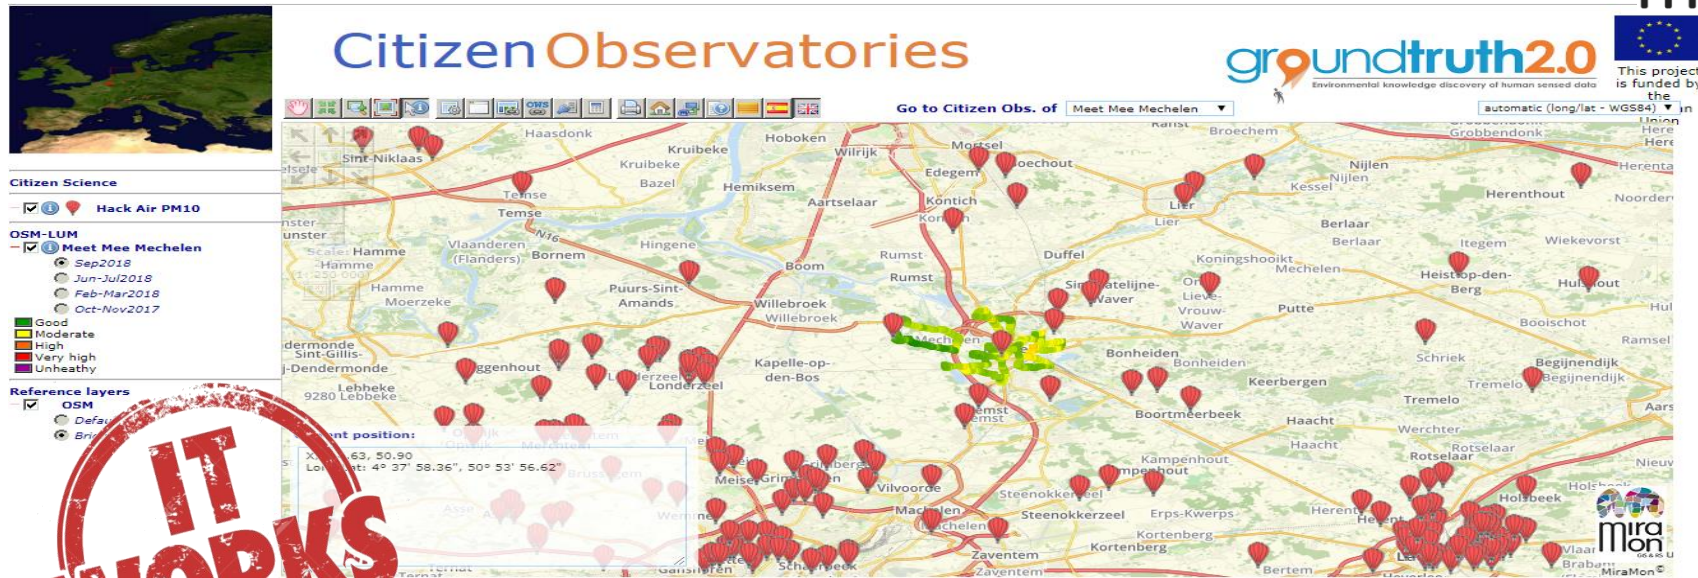

Experiments with interoperability to unlock the meaning within Citizen Science data.

Architectures enabled by standards (just one example)

Combination 1: Groudtruth with Hackair data

<http://www.ogc3.uab.cat/gt20/?config=hackair.json>

Combination 2: Grow with Hackair data

Type ● Air Polution ● Air Temperature

Combination 3: Helgolan with hackair data

We document the results that are approved by the OGC

- <https://www.ogc.org/docs/er>

 OGC Citizen Science Interoperability Experiment Engineering Report	19-083	Joan Masó	2020
This Engineering report describes the first phase of the Citizen Science (CS) Interoperability Experiment (IE) organized by the EU H2020 WeObserve project under the OGC Innovation Program and supported by the four H2020 Citizen Observatories projects (SCENT, GROW, LandSense, and GroundTruth 2.0) as ... Click to continue reading			

The second phase is in progress

- Topics and expected outcomes in the 2on Phase of the IE
 - [SensorThings](#) API
 - Supporting the Earth Challenge 2020 progress
 - OGC definition server
 - *COVID 19*
- More details here:
 - https://external.opengeospatial.org/twiki_public/CitSciE

Nov 28, 2018

Thanks to the initiators and supporters of the IE
